

Borough of Ship Bottom - Route 72 Improvements (\$15 million)

This project will improve the drainage system along Route 72 in Ship Bottom in order to maintain access and egress for Long Beach Island during heavy rain falls and high tide events. The project will also improve traffic flow, as Route 72 is the only vehicle evacuation route from Long Beach Island. This project still needs design, right of way purchase, and construction.

Toms River Township - Route 37 Mathis Bridge (\$73 million)

Route 37 Mathis Bridge Eastbound extends over Barnegat Bay, Toms River, and Ocean County from Milepost 11.4 to Milepost 12.4. Several elements of this bridge exhibit severe deterioration and if no significant repairs are initiated, the useful service life of this structure will be compromised. The rehabilitation design may likely result in more than one construction contract; however, at this time, only one construction project is shown.

Mount Laurel Route 295/38 Missing Moves (\$50 million)

The existing I-295/ Route 38 interchange in Mount Laurel does not provide all the direct traffic movements between the two roadways. This project will provide for the construction of the missing moves via direct and semi-direct connector ramps. The adjacent signalized intersections at Marter Avenue and Briggs Road will be upgraded as well.

Toms River Bus Terminal (\$10 million)

This project will rehabilitate the Toms River Bus Terminal.

Cherry Hill Township - Woodcrest Intermodal Station (\$28 million)

This project involves the construction of a new intermodal station serving NJ Transit's Atlantic City Rail Line in Cherry Hill.

Pemberton Township - Elderly Transportation Program (\$150,000)

This project will replace two older model handicap accessible shuttle buses.

Long Beach Township - Beach Avenue Reconstruction (\$1.3 million)

As a result of its higher elevation, Beach Avenue along with its connection to Ocean Boulevard to the north provides an emergency evacuation route for the residents of Long Beach Island during major storm events. The proposed project will include the installation of stormwater drainage as well as reconstruction of the asphalt roadway to provide better vehicular and pedestrian access along the Atlantic Ocean Front of Long Beach Island.

Borough of Seaside Park - 9th Avenue Improvements (\$1,192,260)

This project will engineer, design, and reconstruct roadway, curb/sidewalk, driveway aprons and drainage, water and sanitary sewer infrastructure along Ninth Avenue from Ocean Avenue to Bay View Avenue.

Borough of Pine Beach Park - Riverwalk (\$1,790,676)

This project will construct a "Riverwalk" along the entire riverfront from Motor Road to Station Avenue.

Evesham Township - Marlton Circle (\$8 million)

This project is related to the NJDOT's plan to reconfigure the Route 73/Route 70 interchange by eliminating the Marlton Circle. The Township is seeking to expand the scope of the project to include provisions for the connection of two roads on either side of Route 73: Main Street and Old Marlton Pike, which were once connected and create a natural network.

Southampton Township - County Road 530 Improvements (\$8 million)

CR 530 has an AADT of over 25,000 cars and a high accident rate due to 11-foot travel lanes and no shoulders, turning lanes, or drainage facilities. This project will provide shoulders, 12-foot travel lanes (except in Pemberton Borough where they will remain 11-feet), and a continuous 14-foot center turn lane. Drainage improvements will be made and a new signal installed at Birmingham Road.

Borough of Lavallette - New Brunswick Avenue Road Improvement (\$440,000)

This project will provide a cross section of 4" gravel base course, 3" stabilized base pavement, and 2" surface pavement over the entire roadway. Construction will include removal and replacement of existing curb and driveway aprons, handicap ramp installation where needed, and installation of additional inlet basins and new storm piping to ensure proper drainage.

Berkeley Township - Western Boulevard Extension (\$8.1 million)

This project will construct an extension of Western Boulevard from Northern Boulevard to Route 9 in Berkeley Township.

Borough of Harvey Cedars - Long Beach Boulevard (920,000)

This project consists of various improvements to Long Beach Boulevard. This will include resurfacing, restriping and upgrades to the existing traffic signals. For traffic calming purposes and to provide a safe haven for left turn movements the roadway will be restriped to provide for single 12 foot lanes of traffic in each direction with a 12 foot center lane area for left turning vehicles and 11 feet shoulders/bike lanes.

Eastampton Township - Bike / Pedestrian (\$4 million)

This project will complete work started through NJDOT's Bicycle/Pedestrian Planning Assistance Program. The project will create sidewalks, crosswalks, traffic lights, and traffic calming components such as roundabouts, bike paths and on-street parking. The goal is to make the entire township safe and friendly to pedestrians and bicyclists.

Berkeley Township - Intersection of Route 9 & Korman Road (\$500,000)

The Bayville Elementary School is located at this intersection, and there is no sidewalk along the Route 9 frontage, which creates a pedestrian safety issue for the children who attend the school. The plan will construct sidewalks, improve crosswalks, and install school safety warning signs to provide children a safe route to walk or bike every day.

Delran Township - Bridgeboro Road Bike Path (\$880,000)

This project will design and construct a sidewalk and bicycle path along Bridgeboro Road (County Road 613) between Hartford Road and Creek Road. This will include structural improvement (i.e., culvert widening, pedestrian bridge) required for the proposed pedestrian/bike path crossing of an existing stream.

Delran Township - Haines Mill Road (\$706,000)

This project will reconstruct Haines Mill Road from Conrow Road to the Moorestown border. This includes various improvements to concrete curbing, driveway aprons, and stormwater management inlets. All stormwater management inlets will be retrofitted with eco-grate castings to comply with current stormwater management regulations.

Medford - Route 70 Widening (\$5 million)

This project will widen Route 70 from 2 to 4 lanes from just west of Eayrestown Road to Chairville Road, and will also upgrade the Route 70/ Eayrestown Road intersection by adding lanes and a new intersection on Route 70. This includes the planning, design, engineering, environmental review, and right of way acquisition and construction.

Township of Stafford - Route 9 Intersection at Southern Regional High School (\$900,000)

The project consists of a traffic signal relocation, access road construction, and parking lot renovation and expansion. It will install a new traffic signal at the intersection of Route 9 and Cedar Bridge Road North and remove the traffic signal at the intersection of Route 9 and Southern Regional High School. The traffic signal removal will require a driveway intersection redesign to improve alignment and restrict left turns out onto Route 9 Northbound.

Township of Edgewater Park - School Pedestrian Pathway Improvements (\$163,846)

This project will improve pedestrian pathways for Magowan Elementary School, improve sidewalks for Ridgway Middle School, and construct a pedestrian pathway on Weimann Field and Ridgway Middle School. A right of way maintenance agreement would have to be executed with Burlington County for sidewalk improvements on Coopertown Delanco Road.

Cherry Hill and Evesham Townships - Bike Trail System (\$102,000)

This project will incrementally construct a designated bikeway system through use of trails, signage, education, and maps to provide recreational facilities and connectivity between neighborhoods and regional networks. The trail will be approximately 0.9 miles long and consist of two lanes.

Borough of Surf City - Barnegat Avenue Reconstruction (\$1.6 million)

This project will reconstruct Barnegat Avenue from 17th Street to South 3rd Street. Barnegat Avenue sees heavier volumes of traffic for NJ Highway Route 72 travelers accessing northern points of Long Beach Island. Upgrades to the roadway will include drainage improvements, traffic striping and crosswalks for pedestrian access, and reconstruction of the asphalt roadway surface.

Ocean County - MOM Line (\$8.8 million)

This project will conduct environmental review for the final environmental impact statement.

Ocean Township - Snake Tunnels (\$1.5 million)

This project will construct 22 4x12 Concrete Box Culverts to be used as Snake Tunnels on the new Township-owned road (the Volunteer Way Extension). The Concrete Box Culverts will be installed every 300 feet as required by the NJDEP.

New Hanover Township - Rossi Road Improvements (\$91,603)

This project includes the engineering design and construction of improvements to Rossi Road and the construction of the Rossi Road extension to provide access for emergency vehicles, school buses, and garbage trucks.

Barnegat Township - Road Reconstruction (\$795,960)

This project will reconstruct the existing roadways from the intersection of Creek View, Woodmansie, and Bridge Roads with East Bay Avenue and continue to the terminus of each roadway. The work will include new drainage and curbing.

Barnegat Township - Road Reconstruction (\$252,200)

This project will reconstruct Memorial Drive in Barnegat Township, New Jersey. The work will include new drainage and curbing.

Mount Laurel Township - Larchmont Boulevard Reconstruction (\$720,000)

This project will reconstruct Larchmont Boulevard. The Township has already completed phase one and phase four of the plan, which were partially funded through NJ DOT funds, and is now ready to begin phase two and three. The cost of the project will be shared through a 10% match.

Willingboro Township - Vansciver Parkway Reconstruction (\$1,890,970)

This project will reconstruct Vansciver Parkway from State Route 130 to JFK Way. The divided highway is a major collector within the Township and requires engineering, design, inspection and construction.

Willingboro Township - Pennypacker Road Bridge Rehabilitation (\$74,738)

This project will rehabilitate the Pennypacker Road Bridge in Willingboro, New Jersey.

Willingboro Township - Van Sciver Parkway Bridge Rehabilitation (\$91,640)

This project will rehabilitate the Van Sciver Parkway Bridge in Willingboro, New Jersey.

Borough of Ship Bottom - Route 72 Bridge Construction (\$207.20 million)

Route 72 Manahawkin Bay Bridges are structurally deficient and in poor condition. This project will construct a parallel bridge over Manahawkin bay, rehabilitate the three trestle bridges over the Hillards, West, and East Thorofares, and conduct intersection improvements. This will provide structural and safety improvements to extend the service life for over 20+ years.

Hainesport Township - Easton Way Rehabilitation (\$700,000)

This project will rehabilitate Easton Way by repairing curbs, improving handicap ramps at the intersections and park area, resurfacing pavement, and upgrading storm drainage.
